

Experience the MatrixCare QAPI program advantage

HOME HEALTH

MatrixCare's comprehensive Quality Assurance and Performance Improvement (QAPI) program equips agencies with the tools needed to help enhance performance and improve compliance. By offering actionable insights into critical areas like infection control and adverse event management, our QAPI program can help home health agencies address existing challenges while achieving sustained success in improving patient outcomes and safety.

How MatrixCare's QAPI program works:

- 1 Perform assessment**
Conduct a thorough evaluation of key performance areas through data from CMS reports, HHCAHPS results, scrubber data, survey outcomes, and documentation audits.
- 2 Create action plan**
Develop custom action items designed to address specific concerns, helping ensure plans are actionable and relevant.
- 3 Implement plan**
Provide tools for implementing two to three action items at a time, assigning ownership and a timeframe for follow-through.
- 4 Monitor progress**
Apply a structured approach to track and assess results against baseline data with routine updates through mutually agreed upon reporting.
- 5 Refine outcomes**
Enable continuous improvement by adjusting strategies based on results and emerging challenges.

MatrixCare's QAPI program can help home health agencies to:

- > Identify and address critical quality issues.
- > Engage clinicians from all disciplines in performance improvement efforts.
- > Comply with Medicare Conditions of Participation 484.65.
- > Enhance patient safety and overall quality of care.
- > Facilitate the development of effective strategies for value-based purchasing.
- > Leverage other services including quality training, survey, and OASIS review.

Discover how MatrixCare's QAPI program can revolutionize your agency's approach to quality assurance and performance improvement. By focusing on tailored strategies and data-driven insights, our program can help elevate patient outcomes and build lasting success.
